EXPERIENCE

Front End Developer | Thor Solutions | Saket, New Delhi, Delhi | October 2023 - Present

· Responsibility as a front end developer to develop interfaces using React.JS to create interactive web pages with a consistent look and feel.
· Crafted responsive web pages to enhance the user experience.
· Actively participated in code reviews, helping to identify and rectify potential issues, improving code quality.

Web developer | Open Source Contribution(Hacktoberfest) | Remote | October 2023 -October 2023

· Prepared a demo website in the "demo" directory, demonstrating proficiency in React.
· Created a user-friendly form within the open-source project's website to streamline plugin submissions.
· Optimized the form to enhance the user experience, simplifying the plugin submission process and encouraging collaboration within the project.
· Established version control with Git for collaborative project management.

PROJECTS

The Wild Oasis | https://the-wild-oasis-lilac-delta.vercel.app/login | October 2023 -October 2023

· Built a web application to manage the operations and booking of a hotel, using React, ReactQuery, and Styled Components, and a PostgreSQL database hosted on Supabase.
· Established a CRUD system for The Wild Oasis Company to manage their cabins. The system allows the company to create, update, and delete cabins.
· Improved the customer experience with the booking system by adding a feature that allows customers to check their own booking status.

Real Estate App | https://estate-app-bice.vercel.app/ | March 2023 - April 2023

· Generated a responsive Real Estate App using React.js, TailwindCSS, and Firebase.
· Implemented a Firebase Realtime Database to store user-generated listings following online and in-app instructions.
· Designed filters for home offers, rentals, and sales, enabling users to quickly find their ideal home by selecting the number of bedrooms and bathrooms.
